

HLP New Product Information Sheet.

Portable Co Gas detector

Model: Az7701

This unit is a small, Co (Carbon Monoxide) gas detector. The unit has a loud alarm that sounds when the detected gas level is above the alarm level set by the user. The alarm level can be between 0 PPM and 999 PPM . The alarm level is easily changed or can be ordered already set at a particular level.. The battery is 3 x AAA batteries and has a long life.

This unit is around the same size as a mobile phone and a belt pouch is included. This is ideal for service people who need to visit hotels, clubs, etc where Co gas likely to be around, such as car parks, near free ways, wood fires, portable or stationary engines. Use this unit to monitor the Co levels while using generators or portable gas powered tools in closed spaces. The alarm comes pre set at 25 PPM and the unit will alarm when that level is exceeded. Check the Carbon monoxide levels in your workplace , car parks etc and verify that the ventilation system is functioning
