

HLP New Product Information Sheet.

FOOD GRADE PROBE THERMOMETER

Model: RAFT

This is an ideal all-round thermometer for use in many industries including food. This unit meets FSANZ standards requirements for accuracy and is made from food grade materials. The measuring range is -50 up to +260C, so it suits all refrigeration and most cooking applications. The probe is connected to the display unit by a strong 1 meter lead and is waterproof. (The main display unit is not waterproof). The unit has an inbuilt alarm function with a beeper so it can be used as a refrigeration monitor to display the temperature and alert staff to a failed refrigeration unit. A compact, versatile and very popular unit.

Size:

108 mm Long Fits in pocket
