

Installation guide

ERC 213

Digital regulator for refrigeration and defrosting, 3 relays.

520H11062

520H11062

The **ERC 213** is a smart, multipurpose refrigeration controller with temperature and defrost management, available with 3 relays. The controller has been designed to fulfil today's requirements for commercial refrigeration applications.

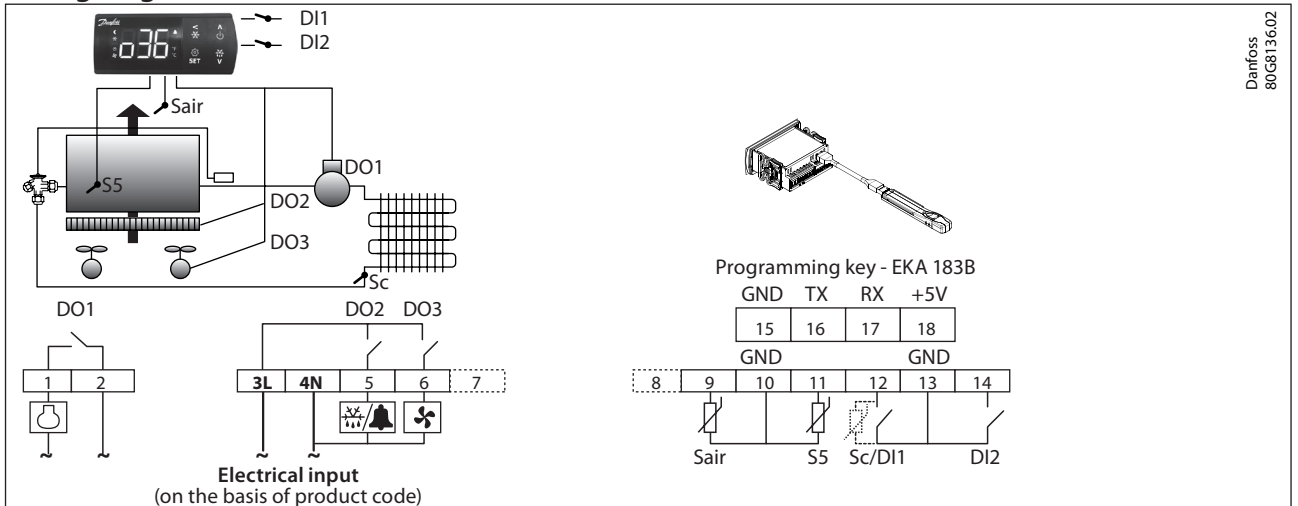

Dimensions (mm)

Assembly

Wiring diagram

1 - Technical features

- **Easy to use:** the four buttons, the easy-to-read menu structure and the preinstalled application solutions guarantee optimal usability.
- **Simple installation:** the 16 A relay means heavy loads can be connected directly without having to use an intermediate relay: compressors up to 2 HP on the basis of the power factor and efficiency of the motor (over 0.65 at 230 V and over 0.85 at 115 V). A vast range of compatible sensor types and screw terminals guarantee highly flexible installation.
- **Unit protection:** special software functions, protecting the compressor from voltage fluctuations or high condensation temperature, to guarantee optimal unit performance.
- **Energy efficiency:** defrosting on request, day/night mode and intelligent evaporator fan management guarantee maximum energy efficiency.

2 - User interface

Button function			
	Press and hold down on startup RESET FACTORY SETTINGS ("FAC" is displayed)		
	Press for one second: BACK Press and hold down: PULL-DOWN		Press for one second: UP Press and hold down: ON/OFF
	Press for one second: TEMPERATURE SETPOINT/OK Press and hold down: MENU		Press for one second: DOWN Press and hold down: DEFROSTING
Display icons			
	Night mode (energy saving)		Fan on
	Compressor on Blinks in pull-down mode		Alarm activated
	Defrosting		Units (°C or °F)

3 - Quick-start configuration

- **STEP 1: Startup**
- **STEP 2: Select quick-start configuration menu**
Within 30 seconds of startup, press "<" BACK for 3 seconds.
The main switch "r12" is automatically set to OFF.
- **STEP 3: Select the preinstalled application "o01"**
The display automatically shows the application selection parameter "o01".
Press SET to select the preinstalled application.
The display shows the default value (for example "AP0", blinking).
Select the type of application by pressing UP/DOWN and then SET to confirm.
The regulator presets the parameter values on the basis of the application selected and hides any irrelevant parameters.
Tip: you can easily switch from AP0 to AP6 and therefore select the simplified parameters list by pressing the UP button (circular list).

App	Description
App 0	None (no preset application)
App 1	Medium temperature ventilated refrigeration units (2 – 6 °C), with timed natural defrost
App 2	Medium temperature ventilated refrigeration units (0 – 4 °C), with timed electrical defrost
App 3	Low temperature ventilated refrigeration units (-26 – -20 °C), with timed electrical defrost
App 4	Medium temperature ventilated refrigeration units (0 – 4 °C), with electrical defrost (by temperature)
App 5	Low temperature ventilated refrigeration units (-26 – -20 °C), with electrical defrost (by temperature)
App 6	None (no preset application) with simplified parameter list

- **STEP 4: Select the sensor type "o06"**
The display automatically shows the sensor selection parameter "o06".
Press SET to select the type of sensor.
The display shows the default value (for example "n10", blinking).
Select the type of sensor by pressing UP/DOWN (n5=NTC 5 K, n10=NTC 10 K, Ptc=PTC, Pt1=Pt1000) then SET to confirm.
NOTE: all the sensors must be the same type.

4 - Menu structure

5 - Quick configuration with "cFg" menu

- Press SET for three seconds to open the parameter groups.
- Select the "cFg" menu and press SET to open. The first menu "r12" (main switch) is displayed.
- Set the main switch to OFF (r12=0) to change the preinstalled application.
- Press UP/DOWN to scroll through the parameters list.
- Configure the parameter "o61" to select a preinstalled application:
 - Press SET to open the parameter "o61".
 - Press UP/DOWN to select an application (AP0= no application).
 - Press SET to confirm; "o61" is displayed.
- Continue to set the following parameters (sensor type "o06") in the "cFg" menu.

6 - Basic functions

Adjusting the setpoint temperature

7 - Default application settings

App	Mode	Description	Temp.	Def. type	Def. end
App 0	Cooling	None (no preset application)			
App 1	Cooling	Medium temperature ventilated refrigeration units with timed natural defrost	(2 – 6 °C)	Natural	Time
App 2	Cooling	Medium temperature ventilated refrigeration units with timed electrical defrost	(0 – 4 °C)	Electrical	Time
App 3	Cooling	Low temperature ventilated refrigeration units with timed electrical defrost	(-26 – -20 °C)	Electrical	Time
App 4	Cooling	Medium temperature ventilated refrigeration units with electrical defrost (by temperature)	(0 – 4 °C)	Electrical	Temperature
App 5	Cooling	Low temperature ventilated refrigeration units with electrical defrost (by temperature)	(-26 – -20 °C)	Electrical	Temperature
App 6	Cooling	None (no preset application) with simplified parameter list

8 - Technical Data

FEATURES	DESCRIPTION
Input	Low voltage, regulated, galvanically isolated, 115 V AC or 230 V AC, 50/60 Hz input
Rated power	Less than 0.7 W
Inputs	4 Inputs: 2 analogue, 1 analogue / digital and 1 digital
Types of sensors allowed	NTC 5000 Ohms at 25 °C (beta = 3,980 at 25/100 °C - EKS 211 for example) NTC 10000 Ohms at 25 °C (beta = 3,435 at 25/85 °C - EKS 221 for example) PTC 990 Ohms at 25 °C (EKS 111 for example) Pt1000 (AKS 11, AKS 12, AKS 21 for example)
Sensors in "Kit Solution"	NTC 10000 Ohms at 25 °C, 1.5 m cable
Precision	Measuring range: -40 – 105 °C (-40 – 221 °F)
	Controller accuracy: +/-1 K below -35 °C, +/-0.5 K between -35 – 25 °C, +/-1 K above 25 °C
Output	Compressor relay DO1: 16 A, 16 (16) A, EN 60730 10 FLA / 60 LRA at 230 V, UL60730 16 FLA / 72 LRA at 115 V, UL60730
	Defrosting relay DO2: 8 A, 2 FLA / 12 LRA, UL60730 8 A, 2 (2 A), EN60730
	Fan relay DO3: 3 A, 2 FLA / 12 LRA, UL60730 3 A, 2 (2 A), EN60730
Display	LED 3-figure display, decimal point and multifunction icons, °C + °F scale
Operating Conditions	-10 – 55 °C (14 – 131 °F), 90% Rh
Storage conditions	-40 – 70 °C (-40 – 158 °F), 90% Rh
Protection	Front: IP65 (with seal) Rear: IP00
Environmental data	Pollution degree II, condensate free
Heat and fire resistant	Category D (UL94-V0)
EMC category	Category I
Certifications	UL acknowledgement (USA and Canada) (UL 60730) ENEC (EN 60730) CQC EC (LVD and EMC Directives) EAC (GHOST) NSF ROHS2.0 HACCP temperature monitoring in compliance with EN134785 Class I if used with sensor AKS 12

9 - Parameters

Parameter Name - ERC 213	Code	Min	Max	Unit	App. 0 (Def.)	App. 1	App. 2	App. 3	App. 4	App. 5	App. 6
Configuration	cFg										
Main switch <i>-1=service, 0=OFF, 1=ON</i>	r12	-1	1		1	1	1	1	1	1	1

Safety standards

Check the input voltage is correct before connecting the instrument.
Do not expose to water or damp: only use the regulator within the design operating limits, avoiding sudden temperature changes with high atmospheric humidity to prevent condensate forming.

Product disposal

The device (or product) must be disposed of in compliance with local waste disposal legislation.

EU design registration
