

Customised doorway and access solutions

COMMERCIAL AIR CURTAINS

EXPERIENCE THE COLDSHIELD AIR CURTAIN DIFFERENCE

Open entryways allow temperature loss and access for insects, dust and odours - the Coldshield Air Curtains provide a powerful and economical solution!

The Coldshield Air Curtain creates an invisible curtain of high velocity air over your doorways and production areas, forming an effective barrier without inhibiting access for your staff or customers.

With 3 speed fans, airflow can be selected to provide maximum reduction of insects, dust and odours from entering your clean zone whilst maintaining air temperature.

Our range of Air Curtains provide an affordable, effective and hassle free solution to controlling your environment.

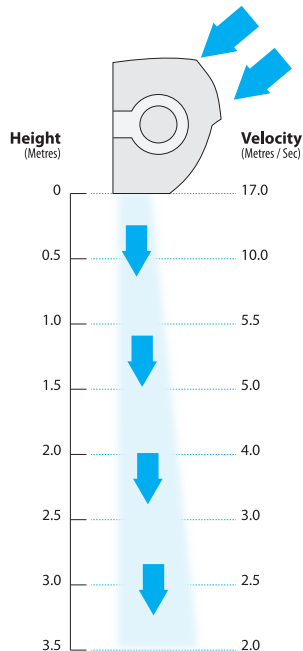

"We installed Coldshield Air Curtains to control insects and air conditioning and found the added bonus of odours from our fishery not entering the restaurant area." Satisfied Customer
