Google Play Store or Apple App Store

Simple app-based solution for food store owners

ProsaLink app, paired with the PR-SC4 connectivity device is a user-friendly, real-time temperature monitoring and automatic data logging solution – combined with alarm notifications to act immediately. Up to 4 cold rooms, display cabinets, refrigerators or freezers can be connected to one device. And you can have an easy overview of all your connected equipment across your sites in the same app.

The solution helps you protect your perishable stock and comply with HACCP – saving time and money. ProsaLink solves three pain points of your refrigeration units:

Food loss

when temperature goes outside safe limits

Alarm via
push notification

Bad food quality

caused by problem in the refrigeration unit

24/7 real-time
temperature data

Time-consuming

manual HACCP
record-keeping

Automatic data logging
& history in the cloud

Plug-and-play

in new or existing equipment

Follow a simple plug-and-play setup to monitor your refrigeration assets around the clock, receive instant and actionable alerts, and efficiently manage HACCP compliance. All of this, remotely and securely stored in the cloud.
