

Find CO Sources Fast!

Fastest Carbon Monoxide Detector Available for Walk-around Testing.

**Model
SCM4**

- **Fast Reacting Sensor for Walk Around Tests**
- **Field Replaceable Sensor**
- **Audio and Visual Alarms**
- **Backlight for Dark Spaces**
- **0 - 1000 PPM Range**

Fast and Easy Sensor Replacement

The SCM4 replacement sensor (RCM4) comes electronically calibrated, and can be purchased directly from your distributor. Simply plug in your new sensor and your SCM4 is automatically calibrated to factory standards. With normal use, the RCM4 lasts for approximately two years. The sensor life is highly dependent on exposure to contaminants, and repeated exposure to contaminants can shorten the life of the sensor.
