

REFRIGERANT FACT SHEET R410A

Gas2Go®

CHARACTERISTICS

R410A is a non-flammable HFC blend refrigerant, developed for use in air conditioning equipment, specifically designed for R410A.

R410A is not suitable for retrofitting due to higher operating pressures.

Gas2Go® recommends alternative refrigerants with substantially lower GWP.

PERFORMANCE

- R410A is not suitable for retrofitting due to the higher operating pressures
- Charging must be done in the liquid phase
- Systems designed for R410A can take advantage of its ability to use smaller components
- Low glide makes R410A suitable for some centrifugal compressors and it can operate in low temperature applications
- R32 is a recommended lower GWP alternative
- Always check OEM guidelines that the equipment has been designed to take R32 as an alternative

APPLICATIONS

Air Conditioning

- Commercial
- Domestic

Water Chillers

- Process cooling

PHYSICAL ATTRIBUTES

- **ODP:** 0
- **GWP:** 1725
- **Class/Type:** Zeotropic blend (A1)
- **Refrigerant Kind:** HFC Blend
- **Oil Type:** Polyolester Oil (POE)
- **Glide:** 0.1K

FEATURES

- A substitute for R22, but CANNOT be retrofitted due to higher pressure
- Higher efficiency compared to R22
- Non-ozone depleting
- Contains R32

THERMODYNAMIC PERFORMANCE

- R410A provides higher efficiency in domestic air conditioning compared to R22
- Operates at approximately 60% higher pressure than R22

PRODUCT PART NUMBERS

- **H410010** 10kg Cylinder
- **H410018** 18kg Cylinder
- **H410050** 50kg Cylinder
